Great things happen when the world's best engineers meet the world's best farmers

4AG is built on listening to our customers, learning from their experiences, and believing there's always a way to do things better.

These are values shared by our European manufacturers, who work closely with us in developing ground-breaking tools that will stand up in one of the world's hardest farming environments.

Like any great collaboration, we talk a lot. We share experiences, observations and ideas, and we discuss feedback received regularly from the farming frontline. Twice a year we travel to Europe where we sit down with the design teams to discuss ways of addressing the specific challenges of our farmers back home.

Factory fitted modifications or subtle changes in product design - they all come from a shared desire to make it better.

Growth it's all in the groundwork

Three generations of industry experience has taught us the value of quality gear

From a small country garage and workshop founded more than 55 years ago, we've grown to become a national provider of equipment for agriculture, specialising in cultivation and representing some of Europe's most respected manufacturers.

After sales support where you are

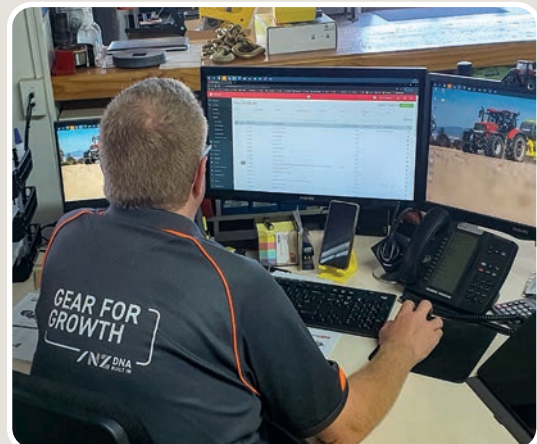

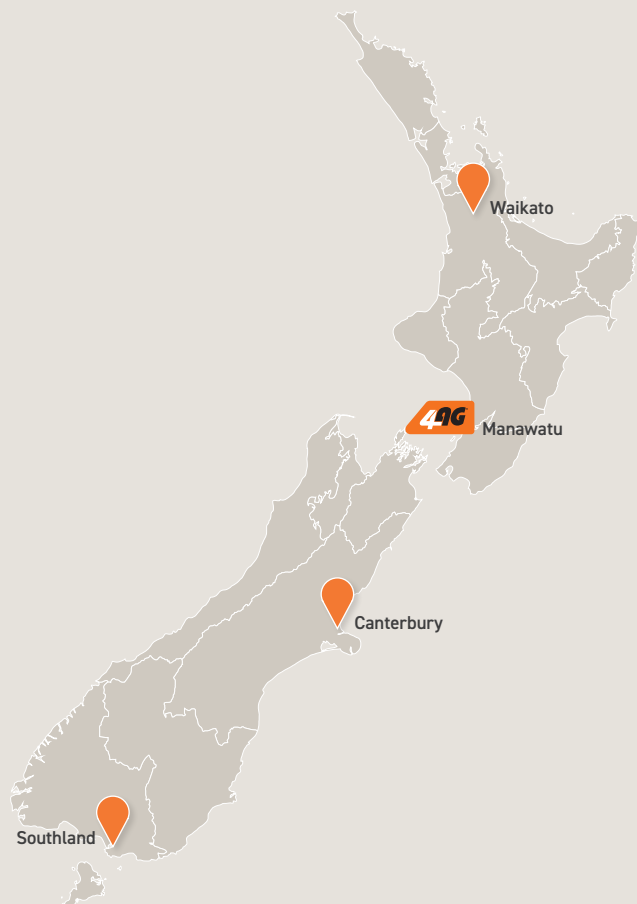

When things go wrong it's how we respond that defines us

As much as we'd like to say our equipment will provide faultless service for as long as we both shall live, the nature of the business means damage happens.

When it does, you want to know your equipment supplier is on the job to get you back up and running as fast as possible.

Rest assured, when you call 4AG, you'll talk with someone who knows what they're talking about. We stock a complete range of spare parts for every piece of equipment we sell, and supply overnight to most places nationwide.

Our service agents are strategically located throughout New Zealand's main agricultural regions and are well trained in 4AG systems and equipment.

FROM TOP TO BOTTOM
In-field demonstrations by our product specialists / We carry an extensive stock of spares for all our machines, with knowledgeable, helpful staff / Our technicians thoroughly inspect every machine during assembly

SICURA SD4500

KEY FEATURES & BENEFITS

- » Vertical folding with transport check valves
- » 36 coulters
- » Twin disc with scalloped opener
- » Seed and fertiliser
- » High tensile dual frame chassis
- » Hydraulic transport chassis with twin wheel rams
- » Mid-mounted wheels for ultimate contour following
- » Oversize 710/45 R22.5 floatation transport wheels
- » 2 Point Hitch
- » True-line® fully pivoting rear section to maintain spacing on curves
- » Precise Seed Placement parallelogram system
- » Loading Steps
- » Adjustable coulter pressure (3 settings)
- » RDS Artemis Metering and control
- » Accord Riser System
- » Road lighting and NZ hazard panels fitted
- » Rated safety chains

SPECIFICATIONS

Model	SD 4500
Working width	4.5m
Transport width	3.0m
Spacing	125mm / 5"
Weight	7300kg
Hopper capacity - Seed**	700ltr
Hopper capacity - Fert**	1800ltr
Hp range*	180-350Hp

*Depends on soil conditions/terrain

**Depends on model
